SUMMARY

Data and Business Analytics enthusiast with experience in Power BI, SQL, Python, and business intelligence through internships and real-world analytics projects. Skilled in dashboard development, forecasting, KPI analysis, and transforming large datasets into actionable business insights.

EDUCATION

B.Tech in Metallurgy & Material Science, COEP Technological University Pune 2023 – 2027
CGPA: 7.73/10

Higher Secondary Education (Class XII), St. Paul Junior College, MSBSHSE 2023
Percentage: 72.33%

SKILLS

Programming	Python (Pandas, NumPy), SQL (MySQL)
Data Analytics	Data Cleaning, Exploratory Data Analysis, Forecasting, KPI Tracking, Trend Analysis, Scenario Analysis, Business Intelligence
Visualization	Power BI (DAX), Matplotlib, Seaborn, Plotly, Dashboard Development
Tools	Advanced Excel, Power Query, Databricks Fundamentals, Google Cloud
Business Skills	Market Research, TAM/SAM/SOM Analysis, Data Storytelling, Stakeholder Communication, Problem Solving

EXPERIENCE

Data Analyst Intern Jul 2025 – Aug 2025
Talent Corner HR Services Pvt. Ltd.

- Built a 5-year revenue forecasting model using 32K+ records to support business planning and performance analysis
- Developed interactive Power BI dashboards with custom DAX measures for KPI monitoring and trend visualization
- Performed What-If and scenario analysis across multiple business variables to evaluate potential growth opportunities
- Collaborated with finance and operations teams to generate data-driven insights for strategic decision-making
- Improved reporting accuracy and reduced manual analysis efforts through dashboard automation and structured data workflows

Market Analyst Intern May 2025 – Jul 2025
Talent Corner HR Services Pvt. Ltd.

- Cleaned, transformed, and analyzed 32K+ data points using Excel and Power Query for business reporting
- Conducted market sizing and competitor analysis using TAM/SAM/SOM frameworks for expansion strategy evaluation
- Built dashboards to analyze franchise performance trends and support operational decision-making
- Performed trend analysis and business research to identify customer and regional growth patterns
- Assisted in preparing analytical reports and presentations for internal business discussions

PROJECTS

Franchise Forecasting Dashboard — Power BI

- Developed a multi-page Power BI dashboard using historical franchise data for forecasting and performance analysis
- Created KPI tracking dashboards with DAX calculations, filters, and interactive visualizations

- Performed trend analysis and scenario modelling to support business planning and expansion evaluation
- Automated reporting workflows and improved visualization clarity for business stakeholders

Dubai RTA Mobility Analytics — DecodeX 2026

- Analyzed 200K+ transportation records using Python and Excel to study public transport demand patterns
- Conducted exploratory data analysis to identify changes in feeder and express route utilization trends
- Built visual reports and dashboards to present ridership insights and operational patterns
- Proposed cost-neutral optimization strategies based on route-level demand analysis

ACHIEVEMENTS

- Top 10 among 1000+ teams in DecodeX National Level Hackathon 2026 (Top 1%, Solo Participant)

CERTIFICATIONS

Data Analytics for Business Professionals (NASBA)	Problem Solving (HackerRank)
Python (Google)	Statistics (Google)
Financial Accounting & Analysis – IIM Bangalore	Databases and SQL for Data Science with Python (IBM)
